EDUCATION

Ph.D candidate in Electrical Engineering | University of California, Riverside 09/2021 - present
M.S. in Computer Engineering | University of California, Irvine 09/2018 - 06/2021
B.S. in Electrical Engineering and Automation | Sichuan University 09/2014 - 06/2018

WORK EXPERIENCE

Associate Instructor | University of California, Riverside 06/2024 - 09/2024
Lecturing for upper-division undergraduate class CS 153 - Design of Operating Systems
Research Intern | Pacific Northwest National Laboratory 06/2023 - 09/2023
Research on micro-architecture security in multi-GPU systems (NVLink)

RESEARCH AREA

Hardware Security; AR/VR Security; Side-channel Attacks; Machine Learning

TECHNICAL SKILLS

Programming Languages & Software: C++, Python, CUDA, TensorFlow, MATLAB, PyTorch, Verilog, Xilinx Vivado, Unity, Unreal Engine

Selected Courses: Autonomous Cyber-Physical Systems (A+), GPU Architecture & Parallel Programming (A), Advanced Operating Systems (A), Pattern Recognition (A), Advanced Computer Vision (A), Advanced System Security (A), Machine Learning & Artificial Intelligence (A)

SELECTED PROJECTS (GOOGLE SCHOLAR)

Research Assistant | [University of California, Riverside, Riverside, CA](#) 09/2021 - present
Attacking NVIDIA GPUs using RFM Rowhammer Mitigation ([under review in Usenix Security'25](#))

- Reverse-engineered the RFM operation and identified opportunities for timing leakage.
- Demonstrated a series of RFM leakage-based covert channel and side-channel attacks on NVIDIA GPUs.

Shared State Attacks in Multi-User Augmented Reality Applications ([Usenix Security'24](#))

- Demonstrated a series of innovative and robust attacks on multiple AR frameworks with shared states, focusing on three publicly accessible frameworks from Meta and Google.
- Proposed several potential mitigation strategies that help enhance the security of multi-user AR applications.

AR/VR typing inference using head motion tracking ([Usenix Security'23](#))

- Developed a system named **TyPose** that autonomously deduces words and characters typed by users from their head motion sensor data.
- Collected tens of user traces depicting AR/VR typing behavior and conducted a thorough evaluation of our attack on these traces, achieving a high level of accuracy.

Side-channel attacks on AR/VR systems via Rendering Performance Counters ([Usenix Security'23](#))

- Introduced a taxonomy outlining potential targets and sources of leakage for software-based side-channel attacks on AR/VR systems.
- Demonstrated five end-to-end side-channel attacks across three distinct AR/VR-specific attack scenarios, achieving a high degree of accuracy.

Research Intern | [Pacific Northwest National Laboratory, Richland, WA](#) 06/2023 - 09/2023
Covert and Side Channel Attacks on NVIDIA's NVLink ([SEED'24](#), [under review in ASPLOS'25](#))

- Reverse-engineered timing and performance counters of NVIDIA Multi-GPU's NVLink interconnect.
- Performed covert and side-channel attacks on the NVIDIA DGX system and Google Compute Platform.

Accuracy-Constrained Efficiency Optimization for Detecting Drainage Crossing ([SC Workshop'23](#))

- Demonstrated the efficacy of resource-aware Neural Architecture Search (NAS) in refining the hyperparameters of SPP-Net, leading to significant enhancements in inference efficiency.

- Performed comprehensive profiling of the drainage crossing detection models on GPU systems, pinpointing the performance bottlenecks unique to single GPU configurations.

Research Assistant | [University of California, Irvine, Irvine, CA](#)

08/2018 - 06/2021

Remote Side-Channel Attack on FPGA to Steal Neural Network Structure ([IEEE TIFS'21](#), [FPGA'21](#))

- Developed a novel ring oscillator (RO)-based remote power attack on FPGAs to steal machine learning models.
- Employed a range of classifiers to effectively recover the hyperparameters of the victim model from side-channel leakages.

DNN Model Stealing Attack via GPU Context-Switching Side-Channel ([DSN'20](#))

- Developed a novel GPU side-channel based on context-switching penalties.
- Implemented LSTM-based inference models to identify the structural secrets of a group of CNN models.

PRESENTATIONS AND TALKS

- "Beyond the Bridge: Contention-Based Covert and Side Channel Attacks on Multi-GPU Interconnect" at IEEE SEED 2024, Orlando, Florida, USA, May, 2024
- "Accuracy-Constrained Efficiency Optimization and GPU Profiling of CNN Inference for Detecting Drainage Crossing Locations" at SC'23 Workshop, Denver, CO, USA, November, 2023
- "It's all in your head(set): side-channel attacks on augmented reality systems" at USENIX Security'23, Anaheim, CA, USA, August, 2023
- "Poster: Stealing Neural Network Structure through Remote FPGA Side-channel Analysis" at FPGA'21, virtual, February 2021
- "Leaky DNN: Stealing Deep-Learning Model Secret with GPU Context-Switching Side-Channel" at DSN'20, virtual, June 2020

MEDIA COVERAGE

Side channel attacks on AR/VR headset via rendering performance counters

- Reported by [UCR News](#), [ZME Science](#), [Tech Xplore](#), [Analytics Insight](#), [Gillett News](#), 2023

AR/VR keylogging from user head motions

- Reported by [UCR News](#), [Fagen Wasanni](#), [Analytics Insight](#), [Game Is Hard](#), [Knowridge](#), [Inside](#), 2023

TEACHING EXPERIENCE

Associate Instructor at University of California, Riverside

- Design of Operating Systems (CS 153) – [Syllabus](#) Summer 2024

Teaching Assistant at University of California, Irvine

- Organization of Digital Computers (EECS 112) Spring 2021
- Next Generation Search Systems (CS 125) Winter 2021
- Object Oriented System & Programming (EECS 40) Fall 2020
- System Software (EECS 111) Spring 2020
- Continuous-Time Signals and Systems (EECS 150) Winter 2019

HONORS AND AWARDS

- International Peer Educator Training Program Certification (IPTPC) Level 1 2023
- Student Travel Grant for IEEE Symposium on Security and Privacy 2021,2022
- Student Travel Grant for ACM Conference on Computer and Communications Security 2021
- Student Travel Grant for USENIX Security Symposium 2021
- Dean's Distinguished Fellowship Award (UC Riverside) 2021
- Sichuan University Scholarship (China) 2014–2018

VOLUNTEERING, DIVERSITY & INCLUSION

- **Challenge Course Judge** at Inland Empire Regional Seaperch Competition 2024
- **Volunteer** at ACM ASPLOS 2024 2024
- **Volunteer** at IEEE International Symposium on Secure and Private Execution Environment Design (SEED) 2024
- **Mentor** at UCR Graduate Student Mentorship Program (GSMP) 2022-2023
- **Volunteer** at 120th Anniversary of Sichuan University 2016.9
